

**Figure 1**

```
graph LR; Stimulus --> Subject; Stimulus --> Computer[Computer Program]; Subject -- Response --> Comparison[Comparison]; Computer -- Stored Response --> Comparison; Comparison -- Feedback --> Subject;
```

The diagram illustrates a closed-loop system where a stimulus is presented to a subject and a computer program. The subject generates a response based on the stimulus. This response is then compared by the computer against a pre-stored response. The result of this comparison is fed back to the subject to adjust their subsequent responses.
